

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

M.DCC.LXXIV.

# A D V E R T I S E M E N T.

**T**HE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society as from repeated declarations, which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume. And this information was thought the more necessary, not only as it had been the common opinion, that they were published by the authority, and under the direction, of the Society itself; but also, because several authors, both at home and abroad, have in their writings called them the *Transactions of the Royal Society*. Whereas in truth the Society, as a body, never did interest themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought adviseable, that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such, as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the

reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the chair, to be given to the authors of such papers, as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.

At a C O U N C I L, January 28, 1773.

Resolved, That after Volume LXII. the *Philosophical Transactions* be published twice in a year; the first publication to be of the months of November and December of the preceding year, and January and February of the current year, as soon as may be after February, under the name of the "first part" of the volume: and the second publication to be of the remaining months unto the recess of the Society, as soon as may be after the recess, under the name of the "second part" of the volume.

## V O L. LXIV. P A R T I.

- I. *Observations on the Solar Spots.* By Alexander Wilton, M. D. Professor of Practical Astronomy in the University of Glasgow. Communicated by the Rev. Nevil Maskelyne, Astronomer Royal. p. 1
- II. *Astronomical Observations by the Missionaries at Pekin.* Transmitted to the Supra-cargoes at Canton, by the Rev. Father Louis Cipolla, of the Tribunal of Mathematics, and communicated to the Royal Society by the Court of Directors of the East-India Company. p. 31
- III. *The Lunar Eclipse, October 11, 1772, observed at Canton.* Communicated by John Blake, Esq. of Parliament-Street. p. 46
- IV. *Experiments on Dying Black, by Mr. James Clegg, of Redivales, near Bury.* In a Letter to Dr. Percival. p. 48
- V. *Observations on the State of Population in Manchester, and other adjacent Places.* By T. Percival,

- cival, *M. D. F. R. S. and S. A. Communicated by the Rev. Dr. Price.* p. 54
- VI. *Observations on the Bill of Mortality, in Chester, for the Year 1772. By L. Haygarth, M. D.* p. 67
- VII. *Electrical Experiments by Mr. Edward Nairne, of London, Mathematical Instrument-maker, made with a Machine of his own Workmanship, a Description of which is prefixed.* p. 79
- VIII. *On the noxious Quality of the Effluvia of putrid Marshes. A Letter from the Rev. Joseph Priestley, LL. D. F. R. S. to Sir John Pringle.* p. 90
- IX. *Farther Proofs of the Insalubrity of marshy Situations, by the Rev. Richard Price, D. D. F. R. S. in a Letter to the Rev. Dr. Horsley.* p. 96
- X. *Of the Culture and Uses of the Son or Sun-plant, of Hindostan, with an Account of the manner of manufacturing the Hindostan Paper. By Lieutenant Colonel Ironside. Communicated by Dr. Herberden.* p. 99
- XI. *An Improvement proposed in the cross Wires of Telescopes, by A. Wilson, M. D. Professor of Practical Astronomy in the University of Glasgow. In a Letter to the Astronomer Royal.* p. 105
- XII. *The Case of a Patient voiding Stones through a fistulous Sore in the Loins, without any concomitant Discharge of Urine by the same Passage: In a Letter to Dr. Maty, from Mr. S. F. Simmons.* p. 108
- XIII. *The Disparition of Saturn's Ring, observed by Joseph Varelaz, Lieutenant of the Royal Navy of the King of Spain, and Professor of Mathematics, in the Academy of Guard-Marine at Cadiz. In a Letter to Dr. Morton.* p. 112
- XIV. Of

- XIV. *Of the Gillaroo Trout. A Letter from the Hon. Daines Barrington, F. R. S. to the Rev. Dr. Horsley.* p. 116
- XV. *Account of the Stomach of the Gillaroo Trout, by H. Watson, F. R. S. In a Letter to Sir John Pringle.* p. 121
- XVI. *A Description of a petrified Stratum, formed from the Waters of Matlock, in Derbyshire. By Mathew Dobson, M. D. Communicated by Dr. Fothergill.* p. 124
- XVII. *Remarks on the Aurora Borealis. By J. S. Winn. In a Letter to Dr. Franklin.* p. 128
- XVIII. *Experiments concerning the different Efficacy of pointed and blunted Rods, in securing Buildings against the Stroke of Lightning. By William Henley, F. R. S.* p. 133
- XIX. *Remarks upon a Passage in Castillione's Life of Sir Isaac Newton. By John Winthorp, LL. D. Hollisian Professor of Mathematics, at Cambridge, in New England.* p. 153
- XX. *M. De Luc's Rule for measuring Heights by the Barometer, reduced to the English Measure of Length, and adapted to Fahrenheit's Thermometer, and other Scales of Heat, and reduced to a more convenient Expression. By the Rev. N. Maskelyne, F. R. S. Astronomer Royal.* p. 158
- XXI. *A Letter to the Astronomer Royal from Samuel Holland, Esq. Surveyor General of Lands for the Northern District of America, containing some Eclipses of Jupiter's Satellites, observed near Quebec.* p. 171
- XXII. *Observations of the Immersions and Emergences of the Satellites of Jupiter, taken in the Year 1768,*  
by

*by Ensign George Sproule, of his Majesty's 59th Regiment, on the South Point of the Entrance of Gaspee Bason, which bears from Cape Ferrilong, or the Cape forming the Bay to the Northward, N. 68½ W. by the true Meridian, distant 12½ Marine Miles. Communicated by the Astronomer Royal.*

p. 177

- XXIII. *Astronomical Observations made by Samuel Holland, Esquire, His Majesty's Surveyor General of Lands for the Northern District of North America, for ascertaining the Longitude of several Places in the said District. Communicated by the Astronomer Royal.*

p. 182

- XXIV. *Observations of Eclipses of Jupiter's first Satellite, made at the Royal Observatory at Greenwich, compared with Observations of the same, made by Samuel Holland, Esquire, Surveyor General of Lands for the Northern District of America, and others of his Party, in several Parts of North America, and the Longitudes of the Places thence deduced, by the Astronomer Royal.*

p. 184

- XXV. *Immersion and Emerfions of Jupiter's first Satellite, observed at Jupiter's Inlet, on the Island of Anticosti, North America, by Mr. Thomas Wright, Deputy Surveyor General of Lands for the Northern District of America; and the Longitude of the Place, deduced from Comparison with Observations made at the Royal Observatory at Greenwich, by the Astronomer Royal.*

p. 190

- XXVI. *Extract of a Letter from Mr. Humphry Marshall, of West Bradford, in Chester County, Pennsylvania, to Dr. Franklin, sent with Sketches of the Solar Spots, dated May 3, 1773.*

p. 194

- XXVII. *Account of the House-martin, or Martlet. In a Letter from the Rev. Gilbert White to the Hon. Daines Barrington.* p. 196
- XXVIII. *Extract of a Register of the Barometer, Thermometer, and Rain, at Lyndon in Rutland, 1773, by T. Barker, Esq. Communicated by Sir John Pringle, Bart. P. R. S.* p. 202
- XXIX. *An Account of certain Receptacles of Air, in Birds, which communicate with the Lungs, and are lodged both among the fleshy Parts and in the hollow Bones of those Animals. By John Hunter, F. R. S.* p. 205
- XXX. *M. De Luc's Rules, for the Measurement of Heights by the Barometer, compared with Theory, reduced to English Measures of Length, and adapted to Fahrenheit's Scale of the Thermometer: with Tables and Precepts, for expediting the practical Application of them. By the Rev. Samuel Horsley, LL. D. Sec. R. S. addressed to Sir John Pringle, Bart. P. R. S.* p. 214
- XXXI. *A Catalogue of the Fifty Plants, from Chelsea Garden, presented to the Royal Society, by the Worshipful Company of Apothecaries, for the Year 1773, pursuant to the Direction of Sir Hans Sloane, Bart. Med. Reg. et Soc. Reg. nuper Præses. By William Curtis, clariss Societ. Pharmaceut. Lond. Soc. Hort. Chelseân. Præfect. et Prælector Botan.* p. 202
- XXXII. *Observations on the Gillaroo Trout, called in Ireland the Gizzard Trout. By John Hunter, F. R. S.* p. 210
- XXXIII. *Explication of a most remarkable Monogram on the Reverse of a very antient Quinarius, never before published*

*published or explained. In a Letter to M. Maty, M. D. Sec. R. S. from the Rev. John Swinton, B. D. F. R. S. Custos Archivorum of the University of Oxford, Member of the Academy degli Apatisti at Florence, and of the Etruscan Academy of Cortona in Tuscany.*
